

Robocall Mitigation Policy

The Federal Communications Commission (“FCC”) has requested that telecommunication companies combat illegal robocalls originating from or trying to reach their network. Sacred Wind has put into place a robust technological solution which can identify unauthorized and/or suspicious use of phone numbers. If illegal activity is identified on a customer’s line, a Company representative will contact you immediately to make you aware of the illegal activity so that it can be addressed.

Sacred Wind takes this illegal robocall activity seriously, as does the FCC. We will do whatever we are able, with your help, to prohibit nuisance robocalling.

Please visit Sacred Wind’s website at: sacredwindcommunications.com to view the Company’s updated Terms and Conditions, which includes a statement about illegal robocalling, and view the Company’s Application for Residential Service, which includes a statement about illegal robocalling.
